EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Atty. Niels Haun (Reg. No. 48,488) on 1/19/04.

Please delete claim 13 and replace with the following:

13. The optical fiber switch of claim 1 wherein at least one fiber array includes an alignment sphere and a micromachined pit.

Please delete claim 17 and replace with the following:

17. The optical fiber switch of claim 1 wherein the first stationary fiber array and the second stationary fiber array comprise a shared common base chip and a shared common top chip.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art, either alone or in combination, does not disclose or render obvious a fiber optic switch having an object disposed on the front face grooves between the first stationary fiber array and the movable fiber array; an object disposed on the front face groove and rear

face grooves between the second stationary fiber array and the movable fiber array; whereby the movable fiber array moves in a transverse direction by rolling or sliding on the objects in combination with the rest of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art has sliding fiber arrays, but no object between them to aid in the motion with the exception of Shimuzu et al. (5177804). Shimuzu et al., however, does not have either a first *stationary* optical fiber array or a second *stationary* optical fiber array.
